

COOPERATION NETWORK „EQUITY IN HEALTH“

- Nationwide network with 66 partners (number still rising)
 - Established in 2003 by the Federal Centre for Health Education (BZgA)
- **Create transparency and make practice in social status-based health promotion more visible**
 - **Support the development of health promotion by 12 Good Practice criteria and a number of models of Good Practice**
 - **Coordination Centers for Equity in Health in all federal states**
- Main activity: Municipal partner process „Health for all“

Concept, statement of purpose

Prevention and health promotion are anchored in the concept.

Target group

The concept reaches people in difficult social situations.

Innovation and sustainability

New problem solutions and/or continuity and long-term impact.

Multiplier concept

Systematic involvement and qualification of multipliers.

Low-threshold method

Programme type: soliciting, accompanying and/or follow-up offerings.

Participation

Numerous participation options for the target group.

Empowerment

Enabling, qualification and strengthening of resources.

Settings approach

Geared to the settings of the target group, e.g. a specific neighbourhood.

Integrated action concept/networking

Pooling of resources and interdisciplinary cooperation.

Quality management/development

Continuous process of improvement.

Documentation and evaluation

Evaluations of processes and work results are incorporated.

Cost/benefit ratio

Reasonable ratio of costs to benefits.

„Prevention chain“ – integrated communal strategies for growing up healthy
